PROFILE

Product Designer & Frontend developer focused on **SaaS, digital products, and landing experiences**. I combine product thinking, UI/UX design, visual design and frontend development to turn ideas into functional digital experiences. Experienced in taking projects from **concept and product structure** through **interface design and frontend implementation**, with a growing focus on AI powered products and modern interaction design.

High School Diploma

Kandy, Sri Lanka

Apr 2026

- **Related Coursework:** Physical Science (ICT)

PROJECTS

Orbit - AI B2B Analytics SaaS Landing Page | [Live Link](#) | [Repo](#)

Personal Project

Web designer & developer (UI/UX & Landing Page)

Aug 2026 – Sep 2026

- Designed and developed a B2B SaaS landing page and product interface for an AI-powered business analytics concept.
- Defined the product structure, information hierarchy, user flows, and core interface before implementation.
- Created a cohesive visual system using Figma, typography, color, spacing, and reusable UI patterns.
- Developed the responsive frontend using React, TypeScript, Tailwind CSS, and GSAP.
- Designed interactions and scroll-based motion to communicate product capabilities and improve the landing-page experience.
- Explored AI-assisted product functionality and integrated application concepts around data-driven business insights.

Meridian- Healthcare Booking Landing Page | [Live Link](#) | [Repo](#)

Personal Project

Web designer & developer (UI/UX & Landing Page)

Jun 2026 – Jul 2026

- Designed and developed a healthcare booking landing page focused on clarity, trust, and conversion.
- Structured the page around user needs, service value, and clear calls to action rather than purely visual presentation.
- Created a responsive UI system with consistent typography, spacing, color, layout, and component patterns.
- Translated the Figma design into a responsive React frontend using TypeScript and Tailwind CSS.
- Applied product and UX principles to simplify information hierarchy and improve the overall booking experience.

Mindsync - Productivity Product Landing Page | [Live Link](#) | [Repo](#)

Personal Project

Web designer & developer (UI/UX & Landing Page)

Apr 2026 – May 2026

- Conceptualized and designed a productivity platform focused on mood, energy, focus, tasks, reflection, and personal progress.
- Developed the product concept, information architecture, user flows, and landing-page experience.
- Designed a calm, focused visual system combining typography, color, spacing, interaction, and information hierarchy.
- Built the landing page using React, TypeScript, Tailwind CSS, and GSAP.
- Created responsive layouts and interactive sections to communicate the product concept and its core features.
- Explored how product design can move beyond conventional task-management patterns toward a more human-centered productivity experience.
- Planned the product architecture for future integration as a mobile or desktop application.

ACTIVITIES AND LEADERSHIP

Aviation Society of Girls' High School

President

Kandy, Sri Lanka

Oct 2024 – May 2025
